DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "10" has been used to designate both "parallel passages" and "side fork" in Fig. 1 and in the specification.
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "bearing end" and the "servomechanism" of claim 1, the "computerized motor-brake system in the rollers or belts" of claim 4, the "computerized servomechanisms" of claim 5, the "auxiliary framing" of claim 6 and the "side rolling systems" of claim 7 must be shown or clarified in the specification or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to under 37 CFR 1.71, as being so incomprehensible as to preclude a reasonable search of the prior art by the examiner. For example, the following items are not understood:

In the specification, it is not clear: on Page 3, in lines 25-26, how the clamp screws (11) allow for fixing the transverse position of the assembly on the bars or guides (3), on Page 3, in lines 31-32, how the assembly of the column (8) is aided by means of a side fork (10), on Page 3, lines 33-34, how the bushing (7) and the threaded rod (11) allow for relative rotation and vertical movement, and on Page 3, line 30-31, 35 and Page 4, line 1-3 whether a bicycle is supported on supporting means (9) or not since lines 30-31 says support (9) can support a bike while line 1 says the opposite.

Applicant is required to submit an amendment which clarifies the disclosure so that the examiner may make a proper comparison of the invention with the prior art.

Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

A shortened statutory period for reply to this action is set to expire ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this letter.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-7 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1 and 3 recite the limitation "the bicycle" in line 2 and "the end rollers and belts" in line 2-3 respectively. There is insufficient antecedent basis for these limitations in the claims. Applicant should clearly disclose that the training bench is adapted to be used with a bicycle and a bicycle is not part of the invention. Claims 2-7 are also rejected for being dependent on a rejected base claim.
